CAREER OBJECTIVE

IT Engineer and MSc in Data Science with 3 years of experience in data analytics, data engineering, business intelligence, software development and DevOps. Proficient in Data Analysis and modelling, software development methodologies, and project management, offering focused solutions to complex software challenges. Adept at problem-solving, teamwork, and adaptability, ensuring seamless collaboration and project success.

Interested on Data Science, Data Engineering and Artificial Intelligence industry and how to optimize business performance through machine learning, data analysis, statistics, and data visualization combined with developed Python and SQL skills.

EDUCATION

Master of Data Science and Innovation

Jan 2024 - Dec 2025

University of Technology Sydney

- GPA 7 (out of 7) - Outstanding Academic Student Award.

Bachelor in Systems and Telecommunications Engineering

Jan 2017 - Dec 2022

Sergio Arboleda University

- 4.57 GPA (out of 5)
- Graduated with Academic Honors

SKILLS

- **Data Science and AI:** Machine Learning design and implementation using Python, Sci-kit learn and PyTorch. Data analysis and visualizations for Business Intelligence using Power BI. AI development with LangChain, LangGraph.
- **Software Deployment & Architecture:** Docker, Jenkins, Kubernetes, Oracle Cloud Infrastructure.
- **Data Management:** ETL procedures (Informatica), DLT, DBT, Data Warehousing and storage management, Relational Databases (OracleSQL, PostgreSQL, MySQL, SAP HANA), Non-relational databases (MongoDB).
- **Front-End Development:** ReactJS, Material UI, Bootstrap.
- **Back-End Development:** NodeJS-based frameworks (ExpressJS, NestJS), Java applications (JSP, JPA, Hibernate, Spring, Spring Boot), and JUnit Testing.

PROFESSIONAL EXPERIENCE

Associate Consultant

Dec 2025 - Current

Synogize

- Conducted SAP HANA SQL procedure debugging and modifications for a new tool in TMCA (Toyota Motor Corporation Australia) intended to enhance the demand planning and order allocation of vehicles, increasing the effectiveness of the process in 60%.
- Implemented automated data ingestion pipelines and data migration into the business warehouse of TMCA.
- Performed SIT testing over the master data platform of the company comparing data from SAP HANA to Microsoft Fabric.

Data Science and AI Intern

Aug 2025 - Nov 2025

Synogize

- Developed agentic AI solutions to automate data engineering workflows using LangChain and LangGraph.

- Implemented automated data ingestion pipelines with Data Load Tool (DLT) and data transformation workflows with Data Build Tool (DBT).
- Designed an AI-driven MVP for data ingestion, transformation, and structuring within a Medallion architecture, integrating API-based data sources and Snowflake as the data warehouse.

Consultant

Jul 2023 - Jan 2024

NFQ Advisory Services & Solutions

- Developed customised products using Java within the Calypso Platform for specific clients.
- Conducted JUnit testing for automated processes in BBVA Spain's Calypso implementations.
- Designed Power BI dashboards for performance metrics of the Calypso system, helping to identify risks on the infrastructure load or possible errors in the trades registered on the platform.

Full Stack Developer

Mar 2023 - Jan 2024

Assisttu (Tu Plan Live LLC)

- Managed databases, including PostgreSQL, MongoDB, and Hashicorp Vault, for secure credential storage.
- Implemented CI/CD pipelines for cloud infrastructure deployment and maintenance via Digital Ocean.
- Integrated AWS services such as S3 and RDS on web application infrastructure.
- Developed a ReactJS front-end with Material UI and NodeJS back-end using Express Framework and JWT integration.
- Ensured completeness and quality of the project as project manager of development team.

DevOps Technician

Aug 2022 - Jun 2023

Informa Colombia

- Maintained CI/CD flows of enterprise applications using technologies such as Docker and Jenkins.
- Administered Kubernetes Clusters using k8s and Rancher.
- Developed technical deployment strategies for new software products.
- Collaborated with internal customer areas in order to improve related technological tools facilitating daily work commitments.

Backend Developer

Jun 2022 - May 2023

Coally SAS

- Managed non-relational databases (MongoDB) for document storage.
- Integrated Coally API with external services such as OpenAI, SendGrid, and Twilio.
- Contributed to developing core modules of Coally back-end API, developed in NodeJS with Express Framework.
